

CMW Horticulture Ltd

Serving the professional grower since 1989

Gigant 2

Fast, efficient crop removal and shredding

- **Speeds up crop removal and turnaround**
- **Clears up to 20,000 m² crop area per day**
- **Finished product is composting-ready**

Gigant 2 features

- 4.5 litre 85 HP John Deere diesel engine
- Heavy duty construction
- Self propelled caterpillar tracks
- Ideal for Strawberries. Other crops on request.
- Fitted with UK safety equipment
- CE certified in accordance with EU machinery directive

'Our Gigant shredder is indispensable now'

- Peter Overvoorde: East End Nurseries

Peter Overvoorde has a keen eye for labour saving investments:

'Labour is our single biggest cost, and the seasonal nature of our business creates tremendous peaks for our workforce. We also want to minimise time between taking the old crop out and replanting.'

East End Nurseries in Keyingham, East Yorkshire is a modern 9 acre substrate soft fruit unit. Peter makes sure it runs efficiently.

"Removal of the old strawberry crop was always a headache before we invested in our Gigant 2 shredder. Not only did the work take longer and require more people, but we ended up with unprocessed crop waste which took ages to compost. Now with just 3 men, we can

clear 1,500 sq metres per hour and have it ready for composting straight away. The Gigant has become one of our most indispensable pieces of equipment."

Clears up to 1500 m² per hour with just 3 men

Showing Gigant 2 with optional 4000 litre bunker. Using the bunker enables the shredder to run continuously so that only one forklift is required to take away the shredded waste

Two operators can feed the Gigant 2 during the crop removal process
